## Basic Specifications

## Track Driven Heavy Transporters

400 to 4000 US Ton Capacities  
Independent Track Drive for Manueverability  
Mechanical and Hydraulic Drive Available  
Continuous Varivable Speed Turning  
Automatic Lubrication Systems  
Pin Connected for ease of Assembly / Disassembly  
Simplified Design for ease of Maintenance  
Ascend and Descend Grades exceeding 10%  
Hydraulic Bolster Systems Available

These rugged, dependable and powerful diesel driven machines are the world's most proven crawler transporters for the hauling of heavy, outside loads in difficult terrain and extreme environments. Independent Track Drives give these transporters exceptional manueverability in confined spaces.

Lampson Crawler Transporters are equipped with the patented Rolli-Flex Suspension System, providing each track roller with resilient vertical motion, allowing uniform load sharing and minimizing point loads.

These crawler transporters offer simplified controls, rapid operator training and maximum operational safety. All of these attributes, coupled with the ability to be easily disassembled and transported by conventional over-the-road trucks, gives you the best choice for your transport projects worldwide.
